MEDICAL INDUSTRY

Medical applications often require the highest level of cleanliness, whether it is a clean room or an operating room. FabricAir dispersion systems are a great solution

FORDELE

- ✓ Det hygiejniske alternativ til metal
- ✓ Anti-microbial

because of the anti-microbial fabric option, the washability of the ducts, general benefits

such as no condensation and

no drafts, and because our recommended fabric for Medical applications are compatible with common clean room standards.

✓ Trækfri

✓ Støjfri

In the medical industry there are many standards you have to fulfill in order to make production. One of the most important standards is Cleanroom Class 100,000. In order to achieve this standard in our production facility we need to have even and effective air

distribution in production areas. After examining the FabricAir product line we decided to use the FabricAir Air Dispersion System as we realized that it was the most effective and feasible solution for our demands. In addition, having the feature of cleaning the system by washing was extraordinary, as a hygienic environment is very important for production facilities like ours.
